

Charter & Objectives

Provide a clear and minimal set of processes and procedures for the creation and establishment of HTNG standards. Ensure that the natural tendencies toward overlap among workgroup products do not create conflicts or issues.

Business Benefits

- Reduces the risk of problems when implementing solutions using HTNG standards (a substantial benefit).
- Speeds the development and release of workgroup products by creating a transparent and repeatable process.

Planned Deliverables

- First version of HTNG Governance Process and Procedures (summer 2008)

Participants

The Governance Council is expected to include representation from each of the six HTNG workgroups.

The initial work to create the draft Process and Procedures is being led by the following two companies, with input from each of the HTNG workgroups and team leaders.
