

# *In-Room Technology Workgroup* **In-Room Control Integration Team**

## *Charter & Objectives*

Provide a roadmap and guidelines for “next generation” interoperability of in-room guest controls and devices between multiple vendors to enhance the guest experience and to benefit the hotel operations.

## *Business Benefits*

- Lower cost to network in-room guest devices
- Better guest interfaces and control of in-room devices
- Easier multi-vendor integration and new feature sets

## *Planned Deliverables*

- Establish multi-vendor specifications for in-room guest device communications
- Collaborate within HTNG to ensure interoperability with Property Web Services
- Host vendor “bake-off” events for integration testing and demonstrations
- Create HTNG certification specifications
